

Oversigt / Plan

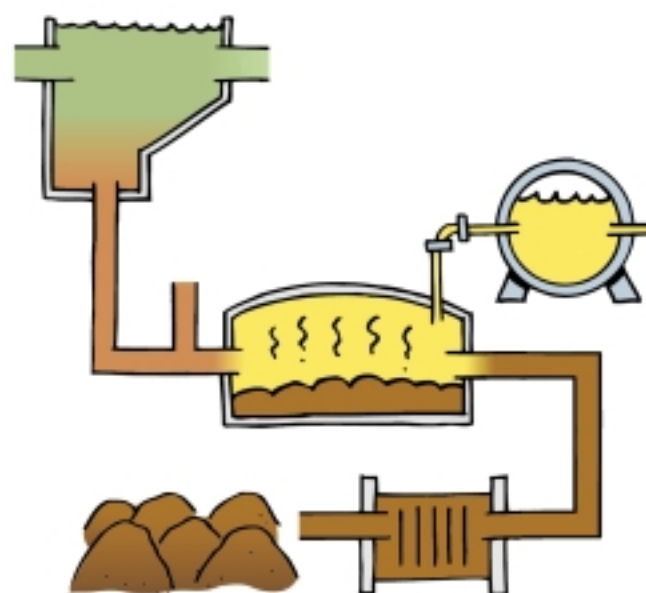

- ① Ristehus og sand- og fedtfang
Screens and grit and grease chamber
- ② Regnvandspumpestation
Rain water pumping station
- ③ Regnvandstanke
Catchment basins
- ④ Forklaringspumpestation
Primary pumping station
- ⑤ Forklaringsstanke
Primary clarifiers
- ⑥ Driftslaboratorium
Plant laboratory
- ⑦ Filterpumpestation
Filter pumping station
- ⑧ Biologiske filtre
Trickling filters
- ⑨ Mellemløsningsstanke
Intermediate clarifiers
- ⑩ Aktivt slam anlæg
Activated sludge unit
- ⑪ Efterløsningsstanke
Secondary clarifiers
- ⑫ Kontaktfilter
Contact filter
- ⑬ Iltningsanlæg
Aeration unit
- ⑭ Modtageanlæg
Sludge receiving unit
- ⑮ Koncentreringstanke
Sludge thickeners
- ⑯ Rådnetanke
Digesters
- ⑰ Gasbeholder
Gasometer
- ⑱ Gasgeneratorer
Gas Motor generators
- ⑲ Slamafvandsningsanlæg
Sludge dewatering unit
- ⑳ Slamsilo
Sludge silo
- ㉑ Kemikalieanlæg
Chemical storage and dosing unit
- ㉒ Mandskabsbygning
Personnel facilities
- ㉓ Styring og overvågning i den gamle møllebygning
Control and monitoring in the old mill

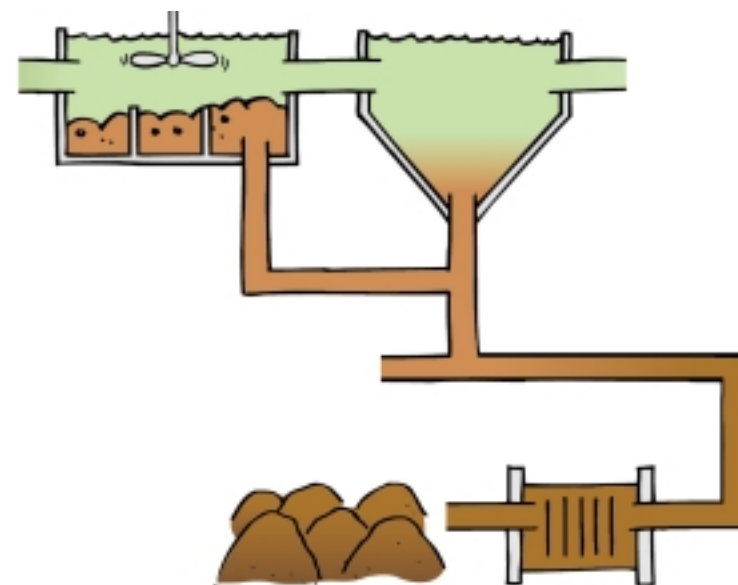

Riste og Sand- og fedtfang
Screens and grit and grease chamber

Slam fra 1. rensetrin til rådnetank og kompostering
Sludge from primary treatment to the digester and then compost production

Slam fra 2. rensetrin til kompostering
Sludge from secondary treatment to compost production

Biogas fra rådnetank til gasgeneratorer
Biogas from digester to gas motor generators
